RE: Support for HB 2792

To the House Committee On Labor and Workplace Standards,

I have been an RN/NP for 30 years. I have worked safe staffing ratios and slowly they added more patients per nurse. It is impossible in today's healthcare to provide good care. When the goal is not to f*ck up because of the number of patients and constant interruptions, it is a sad state of health care. It causes nurses to have moral injuries resulting in many leaving the field. Providence is allowing their ego to dictate their response to striking nurses and providers. They need to do what is right. I demand they disclose the amount of money they are spending on the strike so there will transparency on the size of the CEOs ego.. I demand safe staffing ratios. Nurses deserve wages comparable to the nurses working at other facilities in their same area.

Thank you for accepting my testimony and I look forward to your support.
