Measure, Appointment or Topic: HB3155

I support the ammended bill as presented. My greatest concern is how the registration and license portion will be handled. Will it be through current DMV license offices. They are understaffed now. Will there be money appropriated to enact these changes? Will we have to wait in line or schedule appointments ahead of time in order to get our registrations and vehicle licenses? Law enforcement is also a big concern, we need more law officers now and there doesn't seem to be enough money in the state budget to hire more trained officers. This change will require lots of public education and law enforcement! Is there a plan to have education and training classes for adults over 16 to operate an ATV/UTV? These are not covered in regular driver's license training and testing! There are too many accidents happening now because of untrained operators! Will out of state vehicles be required to purchase any stickers or permits to operate in Oregon? Reipricity with other states? What fines or fees will apply when a person is caught operating illegally?
