

Submitter: Alex Marin cuellar

On Behalf Of:

Committee: Joint Committee On Transportation

Measure, Appointment or Topic: HB3155

The measure should be passed because if passed it will be a new way for more money to be put into circulation. More people will want to take their side by sides or quads and go to places they mightve not gone to before or take more vacations because of this. And this means more people outside visiting stores or any business. In doing this people spend money whether its to eat or buy fuel and they help out other people by supporting their business in buying with them. Even simply registering your machine to be street legal at the dmv will help the state alot. Many people will love to be able to drive their offroad vehicles on the road and will all be going to register their vehicle for on road use very soon, gladly paying for it. This new channel of money flowing into the state will allow the state to have more funds to do what it desires if its improving the roads or improving the community. People love offroad vehicles and enjoy doing things that include their favorite things. Being able to drive your machine instead of your car to the store or cruise for fun is what many Oregonians will be likely to do once this measure is passed. Alot of people stand to benefit from this measure monetarily including all business owners and the state.
