Committee: Joint Committee On Transportation

Measure, Appointment or Topic: HB3155

I would very much like to have UTVs legal to use public streets. Other adjacent states are doing so and it seems to be working well for them.

Of course some restrictions should be in place. They should not be legal on interstate highways. Sustained high speeds would create breakdowns and hazards. Surface streets and 45 mph streets should be the distinction.

I appreciate the opportunity to participate in this process and hope for a positive outcome.
