Measure, Appointment or Topic: HB2792

Transparency in spending is necessary in healthcare. Especially when a healthcare organization is classified as a “Not For Profit”. A law that requires healthcare organizations to share publicly the amount of money they are willing to pour into replacement workers in the fight against their very own communities needs to be passed. These organizations should not be able to hide the astronomical amounts of money they spend on a strike that should instead be reinvested in their own employees and communities.
