

Submitter: Richard Galloway
On Behalf Of: Myself
Committee: Joint Committee On Transportation
Measure, Appointment or Topic: HB3155

there is no reason for modern SxS and other off road machines to not be allowed on roads that allow them access to either trails or other destinations to enjoy those machines. As long as they can match the given speed limits on those roads and are equipped with the necessary lights as needed they are far less likely to cause issues than slow moving farm equipment that is already allowed on those roads. Being able to go from one trail to another on the roads would allow for many more miles ridden on the trails without having to trailer between trail heads. Often those are less than a mile to a few miles. Please make this happen and make everyone's lives easier.
