

Submitter: Gary Humphreys

On Behalf Of:

Committee: Joint Committee On Transportation

Measure, Appointment or Topic: HB3155

I would like to see legal and safe use of OHV'S on specific Oregon roads. This would allow for quick access to towns near the riding areas in Eastern Oregon that my family currently uses. Access to these public roads needs to be reviewed by local residents to have the best interaction with the auto driving public. OHV riders will need proper education to use these roads. I have already configured my OHV'S for road use in other states. Please be consistent with other states.
