

Submitter: Aaron Toney

On Behalf Of:

Committee: House Committee On Climate, Energy, and Environment

Measure, Appointment or Topic: HB2567

Low-income affordable housing providers are currently facing a variety of operating and funding challenges. Oregon's Rental Heat Pump Program supports a critical upgrade that provides safety and comfort for vulnerable residents in a time when funding is not otherwise available. The program provides a straightforward way to connect with qualified contractors and supports local business all while building stronger, more resilient communities. Oregon's Rental Heat Pump Program is enormously beneficial to St. Vincent de Paul of Lane County's senior and other vulnerable residents and communities, by keeping them safe from heat extremes, wildfire smoke, and increasing energy costs. Please support HB 2567.
