

Submitter: Isaac Lafrenz

On Behalf Of:

Committee: Joint Committee On Transportation

Measure, Appointment or Topic: HB3155

Increased Accessibility: It would make it easier for people to access remote areas, especially those who enjoy outdoor activities like camping, hunting, and fishing.

Economic Benefits: Local businesses could see an increase in tourism and sales, as more people might visit areas that are otherwise hard to reach.

Convenience: For people who already own ATVs and UTVs, it would be more convenient to use them for short trips and errands without needing a separate vehicle.

Reduced Traffic: It could help reduce traffic congestion, especially in rural areas where these vehicles are more common.

Fun and Recreation: It adds a new dimension to recreational activities, allowing for more diverse and enjoyable experiences.

Wouldn't it be great to have more freedom to explore Oregon's beautiful landscapes?
