RE: Support for HB 2792

Hospitals must be held accountable to the communities they serve. This winter we have seen corporate healthcare disregard the well being of their workforce and their communities at large. The wasteful use of money on their strike breaking and union busting tactics will be passed on to their patients I'm sure. Transparency of these expenditures will allow the public as well as the workforces make informed decision as they engage with strike breaking organizations.

Thank you for your time and efforts to support workers in Oregon.
