

Submitter: William Proebsting  
On Behalf Of:  
Committee: Senate Committee On Rules  
Measure, Appointment or Topic: SB547

I support making April Oregon's plant appreciation month. Native plants populations are under tremendous stress due to land management practices and climate change. Yet, they are the foundation for healthy insect, bird and wildlife populations, most of which are currently declining. Passage of this bill is an easy way to promote efforts to restore native, productive habitats.
