

Submitter: Bill Bold

On Behalf Of:

Committee: Joint Committee On Transportation

Measure, Appointment or Topic: HB2232

Though I admittedly don't have much knowledge of the experience of the state parks and recreation department with vehicles, but this situation seems to me to require a considerable amount of technical expertise related to vehicles, what works and doesn't work etc. At first glance I believe the department of motor vehicles is a better organization to be specifying safety rules for vehicles, including off-road vehicles, than the parks and recreation department. As a result I am opposing this bill.
