On Behalf Of:

Committee: House Committee On Higher Education and Workforce
Development

Measure, Appointment or Topic: HB2404

We benefit from having an ECI Specialist in our school by

- having direct in person access to all aspects of EOU.
- establishing a warm hand off from high school to higher education. The student has the opportunity to meet and work with someone from the university on a regular basis.
- not only monitoring online college course progress, they meet with students in person to troubleshoot if the student is struggling in the course or with time management.
- being a regular support in the classroom for teachers providing early college credit courses, especially when it comes to registering for the courses.
- being available to provide college going lessons in any classrooms willing to give up some class time for students to learn about opportunities beyond high school.
