

Submitter: Bill Harris

On Behalf Of:

Committee: Senate Committee On Energy and Environment

Measure, Appointment or Topic: SB685

Chairs and members of the committee:

Hydrogen should be added to our energy sources only when the hydrogen is created from air and with solar energy. We seek energy without creating green house gas. Creating H from fossil gas creates green house gas.

Please pass this bill in order to have rethink of the issue by the Public utility Commission before permission to sell hydrogen.
