

Submitter: Christine Perala Gardiner
On Behalf Of: Cave Junction Farmers Market
Committee: Senate Committee On Rules
Measure, Appointment or Topic: SB547

The Native Flora of Oregon is a rich heritage that is still vastly under-appreciated by most Oregonians. Biodiversity is not just for academic people and institutions. The diversity of native plants that have been here much longer than Settlers and their descendants, is real wealth that endures, if we protect this heritage from loss. Only our ignorance threatens this great wealth.

Please lend your full support to this bill in recognition of the importance of Oregon Native Plants.
