RE: Support for HB 2792

To the House Committee On Labor and Workplace Standards,

The money that Providence is using to pay for nurse replacements should have gone to the striking nurses to start with. It is egregious for a “non profit” health care provider to spend millions on replacement nurses than just paying their already employed nurses. Oregonians deserve to know how their money is being spent, and deserve to have their money being spent on providing nurses with living wages and safe staffing. This strike is not on the nurses, it is on the health care system that continues to exploit their employees while making millions off a sick people.
