

Submitter: John Springer

On Behalf Of:

Committee: Senate Committee On Energy and Environment

Measure, Appointment or Topic: SB685

This is the kind of bill that makes everyone ignore all safety warnings that come with new appliances. Too much information. And that is why we have knowledgeable government agencies like the PUC. Changes in the constituency of piped gas should be submitted to and authorized by the PUC. It is absurd to get the public up in arms about this. Next thing, we'll be fighting off rumors on facebook that burning hydrogen causes autism.
