On Behalf Of:

Committee: House Committee On Behavioral Health and Health Care

Measure, Appointment or Topic: HB2540

This would greatly reduce the amount of money needed to meet my deductible and out of pocket expenses. I see a direct care provider due to the wait time for a primary care provider that is in my insurance network. This has allowed me, for example, to get several trigger point injections for \$10 each with minimal wait instead of a large bill after insurance pays for things. These costs are not reimbursed. This measure would save me hundreds in medical care each year and help meet my deductible much faster.
