

Submitter: Kelly Holman  
On Behalf Of:  
Committee: Senate Committee On Natural Resources and  
Wildfire  
Measure, Appointment or Topic: SB777

This bill is a blatant misuse of funds that should be going to real conservation, not the pockets of ranchers. This is not what the majority of the community wants and it is up to you to do the right thing. As a young adult, it is so disheartening to see science ignored for rancher interests. Securing the future of healthy lands should be top priority, not catering to one specific group of people. So many members of the community want to see wildlife treated properly and especially wolves. It is time to start protecting the animals that belong here and stop villainizing the wolf. Ranchers do not need more compensation for predation especially when it is normally deaths caused by other reasons. Please do not pass this bill. Thank you for your time.
