

Submitter: Sara Yang

On Behalf Of:

Committee: House Committee On Behavioral Health and Health Care

Measure, Appointment or Topic: HB2357

I am in support of our speech language pathologist and audiologists providing care to our patients across state lines. Oregon Health and Science University is a tertiary care center that provides care to not only Oregonians but also to those in the surrounding states. Providing virtual visits across state lines would allow us to provide continuity of care for patients that may have difficulty making the long drive to Portland.
