Business, and Trade

Measure, Appointment or Topic: HB3329

Increasing support for the film industry in Oregon should be a no-brainer. I am currently working with producers in LA who want to make a \$5 million film from a script I wrote to be shot in Gresham. A critical factor for them to even consider shooting here is the tax incentive. Considering the shocks to the film industry over the past year or so, I believe there are quite a few potential productions that would leap at a chance to shoot in Oregon, given the incentives, talent, and other resources available. Please support HB3329. Thank you.
