

Submitter: Kai MacKenzie

On Behalf Of:

Committee: House Committee On Education

Measure, Appointment or Topic: HB2953

Early investment in students has a long-term return and benefit for the state. District Special Education programs are underfunded and as a result general education classroom and SPED staff are stretched too thin, impacting the general student population and resulting in Oregon being unable to provide a free appropriate public education to kids with disabilities which is a both morally wrong and a costly risk.
