Measure, Appointment or Topic: HB2738

Hello,

I am in complete support of this bill. Using leaded fuel is completely unnecessary in any context but especially for a hobby at a facility within a neighborhood. This should be a simple implementation and a small impact to the users of PIR since most do not use leaded fuel.

As a Kenton resident of 15 years I was shocked to learn that the use of leaded fuel is still in practice.

Thank you to all involved I support of this ban.
