

Submitter: Bill Bold

On Behalf Of:

Committee: Senate Committee On Energy and Environment

Measure, Appointment or Topic: SB526

It is likely that the microfibers that are showing up in the environment are coming from more sources than just washing machines (what about lint from driers?). I don't believe we know enough about the sources of the microfibers to promote solutions at this point. When we do get to solutions I believe it would be more effective to provide a financial incentive to buy "safe" equipment than ban less effective ones, as this bill will do.
