

I love Oregon, the people, scenery and culture, and want to see us thrive! Filmmakers love our beautiful part of the world and increasing our film tax incentive plays a huge part in attracting and retaining their productions. When our local film industry is in production, it brings in work and business. Oregon on the screen elevates our image and reputation, increasing our tourism and further film work.

In the past several years, films made in Oregon have premiered and won awards at top film festivals in the U.S. and the world...Sundance, Cannes... I am so, so proud of a film that I worked on that premiered at SXSW, won the Audience Award and is releasing in theaters in less than 2 weeks, My Dead Friend Zoe, produced by Travis Kelce and Legion M. The producers would love to come back in the future.

HB3329 is a win-win for everyone.
