Business, and Trade
Measure, Appointment or Topic: HB3329

Hi there.

I support a measure to increase incentives for bringing more film projects to Oregon. There are many local professionals in the crafts which support film work in Oregon. The limited opportunities make it a challenge I meet requirements to retain health insurance and the finances to sustain a standard of living. Oregon has a rich history in the film industry that deserves to be bolstered and enriched. As production costs increase nationally having a competitive edge to bring with to the area is a win-win for the state and the workers.
