

Submitter: Ashlyn John

On Behalf Of:

Committee: House Committee On Behavioral Health and Health Care

Measure, Appointment or Topic: HB3042

I am writing to express my strong opposition to HB 3042, a bill that, if passed, would impose significant restrictions on medical practitioners and undermine the fundamental principles of medical autonomy and free speech. The bill introduces dangerous provisions that could curtail the ability of healthcare professionals to provide independent, evidence-based care and engage in the free exchange of scientific ideas.

In conclusion, HB 3042 is a deeply troubling piece of legislation that poses a significant threat to medical professionals' freedom, autonomy, and ability to engage in scientific discourse. I urge you to oppose this bill in its current form and work towards a solution that supports the rights of healthcare practitioners and protects the public's access to diverse, evidence-based care.
