

Submitter: Milton Stevens

On Behalf Of:

Committee: House Committee On Climate, Energy, and Environment

Measure, Appointment or Topic: HB2738

most race cars have switched to a methanol based, or ethanol based fuel. lead based fuels are outdated. those of us with race car knowledge see this for exactly what it is. its an attack on our race tracks. we've seen it time and time again, this isn't new. this is simply an attempt to shut down PIR, and i honestly have no idea why such a concept would be entertained. leave our race tracks alone!!!!
