

Submitter: ANDREY SLEZKO

On Behalf Of:

Committee: Joint Committee On Transportation

Measure, Appointment or Topic: HB2642

Hello members of the Joint committee on transportation. My name is Andrey Slezko, and I am owner of a small dealership in Portland. I support this bill to privatize DEQ testing. Based on my experience, it would significantly streamline a process that has become less complex and less needed as vehicles have gotten newer and more eco-friendly. Privatizing this sector will free up government resourced as well as making it easier for public drivers and dealers to comply to regulations , and anything that can be done with equal effectiveness but higher efficiency is worth consideration. There are much more positives I believe than negatives for all involved. Thank you
