On Behalf Of:

Committee: House Committee On Climate, Energy, and Environment

Measure, Appointment or Topic: HB2738

I strongly support prohibiting the use of leaded fuel at race tracks in cities. Leaded fuel poses health risks to the public, especially in urban environments where exposure is more concentrated. Removing it will reduce harmful emissions, protect the environment, and promote safer, healthier communities. I'm personally not involved in the racing community, but I'm honestly surprised this wasn't already prohibited.
