Committee: House Committee On Climate, Energy, and Environment

Measure, Appointment or Topic: HB2738

I am a north Portland resident and mom, and I fully support a leaded gasoline ban!! There is no reason to have racing with leaded gasoline. My family recently attended an EV event at the race track and it was wonderful. I'm not a huge fan of racing, but I do understand how it helps the local economy. However, this should not be at the detriment of our children's health and safety! Racing can and should continue lead-free!

Thank you for standing up for this cause,

Meaghan Swiryn
