

Submitter: Jimmy Heriford  
On Behalf Of: PIR Racer  
Committee: House Committee On Climate, Energy, and Environment  
Measure, Appointment or Topic: HB2738

My Family and i have been racing at this track for many years. Shutting down this track could cause the younger generations to race on the streets instead of in a safer environment where the safety of everyone is of high standards. This track is already in an industrial area and the testing has proved the leaded gas is not the problem, if it were the problem then everyone growing up before the 2000s would have been exposed to every car on the road that used leaded gas for decades, This track supports the other city parks financially and if this track is shutdown it would be a travesty that this state has taken away all motorsports in the city of Portland.
