

Submitter: Devra Polack

On Behalf Of:

Committee: House Committee On Climate, Energy, and Environment

Measure, Appointment or Topic: HB2738

I've been a Nort Portland resident for 17 years--11 of them in the Portsmouth neighborhood that neighbors PIR. Portsmouth has more children per capita than almost anywhere else in the city. The asthma rates are high.

We have some of the worst air quality in the city due to factories (including the Malarkey formaldehyde leak), proximity to the I5, and yes, due to the fumes from PIR.

It is enough to live with all this unregulated air pollution, and with the very loud sound pollution every weekend that PIR brings. But this: this is something that can be done to improve our air quality. PLEASE BAN LEADED FUEL.

Thank you for your consideration.
