

Submitter: Roy Bain  
On Behalf Of:  
Committee: House Committee On Climate, Energy, and Environment  
Measure, Appointment or Topic: HB2738

Dear ignorant law makers.

Very seldom do i weigh in. This is the dumbest none needed debate or law. Running leaded gas for a racing event does not affect anything. Racing is a sport i am a part of and support fully. You as law makers continually pick and erode at this sport with noise ordinance, regulations, and general red tape that makes no sense until people and race series wont hold events here. Do you think of the impact on tourism and revenue on these weekends? Its seems the only thing the law makers of oregon think or talk about is illegal immigrants and how to stop trump. We as taxpayers spend billions supporting illegal immigrants when the state cant even maintain and keep highways safe to travel. Stop working on stupid legislation and start fixing real problems. Leave racers, leave race tracks and the peolle who enjoy this sport alone.
