

Submitter: Judy Todd

On Behalf Of:

Committee: House Committee On Climate, Energy, and Environment

Measure, Appointment or Topic: HB2738

The facts are in: the impacts of excessive noise, and air and ground pollution have been measured and known for some time now. The necessity of the use of leaded fuel for cars at the Portland International Raceway is at question. Who benefits? Who pays? Is there a mystery here that only more discussion will continue? Or will the lawmakers simply do the right thing, protect the lives and health of the majority of the people them are sworn to serve?

Vote to end the leaded fuel use activities which are negatively impacting all the N and NE Portland community. Thank you.
