I support maintaining current service levels. Without adequate staff Oregon will have no data in order to make the necessary decisions of how our water resources will be used. This has been the problem for many years, do not make it worse. I support the Governor's request for additional funds to provide a one-time investment of \$100,000 for IT to track water use through the reporting system, and also a one-time investment of \$4.36 million to assist with the necessary legal work.
