

Submitter: Jennifer Harris
On Behalf Of:
Committee: House Committee On Climate, Energy, and Environment
Measure, Appointment or Topic: HB2738

Hello,

My family and I have been users of Portland International Raceway for 30+ years.

The study that was done at Portland International Raceway in 2017 regarding lead levels, found that the concentrations were below levels that would cause harm to the public.

PIR is an important part of Portland's recreational opportunities. Making a hasty decision banning lead fuel at PIR without properly looking into lead fuel use in all aspects of our state would be a poor decision.

Please vote No on House Bill 2738

Jennifer Harris
