

Submitter: Steve Cheseborough

On Behalf Of:

Committee: House Committee On Climate, Energy, and Environment

Measure, Appointment or Topic: HB2738

Motor sports benefit very few, while causing immense harm to many.

We are in a climate crisis, and it is getting worse. There is no reason to allow life-shortening lead to spill across Portland so a few people can watch cars race around a track.

Banning leaded fuel is a good first step.

Thank you.
