

Submitter: Amanda Donovan

On Behalf Of:

Committee: House Committee On Climate, Energy, and Environment

Measure, Appointment or Topic: HB2738

Passing this measure would drastically harm the history and legacy of the PIR race track. There has been substantial evidence proving that the small amount of lead used in some leaded race fuels harms the air quality. And by passing this measure we could all lose out on a lot of family fun events put on at PIR and other Oregon race tracks. We have already lost a lot of tracks in Oregon and seeing another one harmed by this measure would be detrimental to our community. I strongly oppose this measure.
