

Submitter: Jim Plunkett  
On Behalf Of: self  
Committee: House Committee On Climate, Energy, and Environment  
Measure, Appointment or Topic: HB2738

I urge your support of HB 2738. The leaded gas in the race cars causes serious health outcomes. Lead has been a proven toxic pollution for decades. Please continue to progress in protecting human health. If airplanes can fly without leaded fuel, so can race cars.
