Committee: House Committee On Climate, Energy, and Environment

Measure, Appointment or Topic: HB2738

I am writing this in support of the bill to remove leaded gasoline from the racetrack. Leaded gasoline has been proven to cause several health problems, i.e. irreversible nerve damage, mental impairment, reduced fertility and other concerning medical issues. I cannot fathom why lawmakers and corporations sleep at night, putting profit over the well being of people, willfully knowing the hazard that leaded gasoline is to the surrounding neighborhoods. We cannot continue to expose our families to this undeniable risk! THE LEADED GASOLINE MUST GO!
