

Submitter: Noah Goffena

On Behalf Of:

Committee: House Committee On Climate, Energy, and Environment

Measure, Appointment or Topic: HB2738

In an era of blatant attacks on the working class, this measure is completely misguided and uninformed. If we want to tackle climate change, let's go after multibillion-dollar corporations that pollute our state as well as our entire world, not small businesses like our Oregon race tracks and motorsports venues. Let's use common sense and oppose this measure, there are much bigger "fish to fry" and there is no need to disproportionately attack working class Oregonians, who work and play in the motorsport industry.
