

Submitter: Kathleen Boylan

On Behalf Of:

Committee: House Committee On Climate, Energy, and Environment

Measure, Appointment or Topic: HB2738

Oregon State Legislators,

I am writing in strong support of HB 2738. Despite being banned on highways leaded gas is legal at racetracks. Unlike most racetracks, Portland international racetrack is located next to densely populated neighborhoods that are struggling with some of the worst air quality in the city.

No amount of lead exposure is safe

Please support HB 2738 for the health and safe being of Portland residents.

Thank you,  
Kathleen Boylan
