

Submitter: Neil Cuykendall

On Behalf Of:

Committee: House Committee On Climate, Energy, and Environment

Measure, Appointment or Topic: HB2738

I support this measure strongly. The health effects of leaded gas, particularly on children, are clear. There is no compelling reason to expose potentially thousands and thousands of children to this toxic chemical.

I live within a mile of Portland International Raceway, please prohibit leaded gasoline for the sake of my daughter and all other children in the area.
