

Submitter: Margo Lucas
On Behalf Of: Cowgirl Farms
Committee: Senate Committee On Judiciary
Measure, Appointment or Topic: SB558

I support this legislation, but would appreciate an amendment to allow current retailers to sample their staff from inventory as other licensees are able to per current legislation. This would enable retailers to sample staff in an effective and timely manner as products are launched or offered for special discounts. Additionally it would enable retailers to sample all staff simultaneously for marketing purposes to consumers. This would lead to better sales and customer satisfaction as retail employees are able to better describe the products available. These samples could be tracked in Metrc, the same way that samples from product vendors are currently accounted for. Please reach out should you have any questions.

Thank you,

Margo Lucas
