

Submitter: Adam Harkless

On Behalf Of:

Committee: House Committee On Climate, Energy, and Environment

Measure, Appointment or Topic: HB2738

I've been going to P.I.R for years and even raced there myself and not once have I ever had any side effects of leaded fuel. Politicians keep messing with racetracks because they have nothing better to do with their time and would rather see people miserable. If anything were to happen to this track, there will be more street racing on the streets of Portland.
