

Submitter: Sue Craig
On Behalf Of: myself
Committee: House Committee On Education
Measure, Appointment or Topic: HB2684

So many schools now have programs for students to learn about soil, planting of vegetable gardens and plants in general. This is an excellent plan to introduce them gardens/gardening. For that reason, it is part of a schools responsibility to monitor any type of pesticide used for the entire school grounds. The safty of our children/youth is paramount. This should be set up in a way that is easy to monitor for all concerned. Thanks. Sue Craig
