

Submitter: Jason Harmon

On Behalf Of:

Committee: House Committee On Climate, Energy, and Environment

Measure, Appointment or Topic: HB2738

Shutting down the track would indeed exacerbate issues like illegal street racing. Without a designated space for racing, individuals may turn to the streets, leading to increased risks for participants and bystanders alike. It would also attribute to even more noise complaints and traffic hazards in the community.

In addition to safety concerns, the closure would impact local businesses that benefit from events at the track, such as restaurants, hotels, and automotive shops as well all of the family owned companies that sponsor events at the track. The community would lose out on jobs and economic activity generated by races and related events.

This bill would shut down PIR. For reason listed above and many many more this cannot happen.
