

Submitter: Jeff Svela  
On Behalf Of:  
Committee: House Committee On Climate, Energy, and Environment  
Measure, Appointment or Topic: HB2738

I highly oppose this measure. With the new administration the raceway is well under the EPA limits. We all know leaded fuel has zero effect on anything. This is only a power grab and an excuse to shut down the raceway. PIR was there before any of those neighborhoods were. People can do their home work before they buy a house just like everyone else. The parts per million of lead particles are so miniscule that they don't even bother a small bird or insect let alone a human. This is complete horse shit.
