Committee: House Committee On Climate, Energy, and Environment

Measure, Appointment or Topic: HB2738

please take into consideration the amount of people that use this facility and the economic impact it would have to the city and business owners who benefit from them . Most high-performance vehicles . need better fuel then what the normal passenger car purchases from the gas pump. I own a classic car and attend the Wednesday night events and burn a leaded fuel as to not damage my engine . The folks that drag race, the sports cars, and the moto cross bikes need the better fuel as well to not damage their engines . the small amount of leaded fuel that is used in proportion the the amount of un leaded fuel for the folks getting to the events is very small . We have seen the electric cars race at PIR and the fan count was extremely low . Lets not allow our future for racing at PIR to be cancelled . Thanks in advance .
